The Center for Medicaid and Medicare Services announced the government #healthcare website #breach Friday evening, this #cyberattack affecting 75,000 people. <https://t.co/JNtdFZnqxb>

@jgmcglamery @bjdickmayhew I haven't figured out an angle to hack that since I don't know how they move everything from HIOS to <https://t.co/nbGt4r6FJo>

Why is nobody talking about the fact that the <https://t.co/W8la0IXX6g> site, that Obama force everyone to sign up for insurance or be jailed or fined, got hacked recently? And apparently this wasn't the first time! Probably connected to Hillary's email hack.... [Anger]

@LeahR77 @Lrihendry Sounds like Obamacare we have to pass it in order for me read it or if you want to keep your doctor you can keep it! Whatâ€™s hack.

There is a case pending in Texas that could gut Obamacare. The GOP will likely use a favorable opinion from partisan hack Reed O'Connor as leverage to weaken Obamacare in the next Congress. It will be up to the Fifth Circuit to halt O'Connor's ruling.

@paulkrugman @ezraklein Donâ€™t bother addressing the weaknesses of Obamacare. Just sell your product like a good political hack. Isnâ€™t that how Jonathan Gruber scripted it?

MOrrinHatch should be embarrassed by his own â€œstupid and dumbassâ€ comments regarding people who like Obamacare (aka people with pre-existing conditions) heâ€™s an old has been partisan hack who should GTFO of congress already
