twitter_disa_combined_10_percent.docx

I just read DISA was a victim of a cyberattack. DISA just happens to be the agency responsible for military cyberdecurity, where their computers were hacked & maybe affecting over 200,000 people's personal data...

A Breach at one of the networks of the DISA, which secures communications for President Trump and military intelligence and other government officials, affected as many as 200,000 people, exposing their personal information. https://t.co/HVEliSQcJE #cybersecurity #cyberattack @RepMattGaetz @realDonaldTrump @POTUS I (cough, cough) beg to (cough, sneeze, hack) disa- (cough, cough, cough, lungs out)-gree.
